Ask Tilly Haynes of the Broadway Central Hotel if it pays to advertise. Here was a great hotel property that had cost over two millions of dollars, a perfect palace in construction and appointments, that had literally died out, gone to seed, and was closed up. Mr. Haynes took it and spent two hundred thousand dollars in new equipment and a fortune in advertising the fact. And today it is doing the largest business of any hotel in New York. Of course, there must be something to build up such a business on, and Mr. Haynes offers it in the very fact of a most dations at the most reasonable charges. THE RUSSIAN THISTLE.

Vigorous Measures Must Be Taken to Exterminate This Pest.

While Brazil and Hawaii have their little while Brazil and Hawaii have their little difficulties, it may be interesting to know that seeds of a great revolution are being sown in the great west. It is probable that a severe war of extermination will be waged in the Dakotas against a foreign invader, known as the Russian thistle. This persistent weed has caused several millions of damage already. The prospects are that unless general action is taken next summer the weed will spread beyond hope of extinguisnment. L. H. Dewey, assistant botanist of the

Agricultural Department, acting under or-ders from secretary Morton, left Saturday night for the northwest to make an investigation into the extent of the damage done

to the crops.

The weed was introduced into the coun-The weed was introduced into the country about seventeen years ago in some flax-seed and sowed near Scotland, South Dakota. From a small beginning it has spread through the Dakotas and into Minnesota, Iowa, Nebraska and Wisconsin. The seed sprouts in May or June and by September has developed into a plant from two to, six feet in diameter and half as high, forming a dense, bushy mass of rigid branches, offering an effectual barrier to the passage of mail or beast. At intervals of half an inch or less on the branches are clustered three sharp spines a quarter to half an inch long.

It takes complete possession of cultivated land, choking out the wheat and other crops. The rigid, bulky plants often make it imland, choking out the wheat and other crops. The rigid, bulky plants often make it impossible to run harvesting machinery, and sometimes even stops plows. It is often necessary to band leather or other protection on the horses' legs before they can be driven among the spiny weeds. Trains have been stopped by the thistles banking up on the tracks. Prairie fires are carried long distances by the burning thistles blowing across fire breaks. In many other ways this terrible weed causes serious damage.

A movement is now on foot in the northwest to petition Congress to give the Secretary of Agriculture power to institute vigorous measures, as was done in the case of pleuro-pneumonia among cattle a few years ago. A judicious expenditure of two million dollars now would probably exterminate the thistle. It did damage to that amount last year. This year the loss is twice that sum, and if the weed is allowed to go unchecked there is every probability that the damage will go on increasing in geometrical ratio.

AN ALL-NIGHT VIGIL

Scenes Attending Yeatman's Breaking the Record.

LATE NEWS OF THE LOCAL BICYCLISTS

A Maryland Boy Who Made His Own Racer.

GOSSIP OF THE CLUBS.

Many persons on the Conduit road driving between the Great Falls and Georgetown on Monday night were surprised at finding a number of bicyclists occupying the road. At the Anglers' Club house there was a large camp fire, around which sat several wheelmen who whiled away their time telling jokes, discussing wheel matters and occasionally taking a bite of lunch, with the necessary after dinner smoke. At the distributing reservoir there was a large tent and in this several wheelmen chatted merrily, as the slow steeds of the country people on their way to market passed along. They were there keeping time and tally

on E. C. Yeatman, the young bicycle rider of the Washington Road Club, who made such an excellent run in lowering the twenty-four-hour course record. All night long and even far into the day

the camp fire was kept going. The night was dark and dreary and a dense fog. through which the rider had to pass, made his trip a little dangerous as well as extremely unpleasant. Starting as he did at 6 o'clock, he made the first two laps, riding twenty miles and more in one hour and fifteen minutes. Through the early part of the twenty-four hours he kept up to Capt. Jose's scheduled time to cover 328 miles, but after lunch, just before the break of day, he fell off just a little and reduced the schedule to something like 320 miles, and this distance he would have covered had not the heavy down pour of rain set in and cut off his last thirty minutes. As it was, he covered nearly 312 miles and was in good condition when he finished. He was perhaps in better condition than any of those who made the effort before him.

When he finished he appeared in almost as good condition as when he started, but on account of the rain he remained at Brills

all night.
Mr. Yeatman is only about twenty-one years old, but since he has become identi-fied with the clubs he has made many fast rides, and figured in some interesting race events. He rode a twenty-five pound Rambler machine, and for his good work it is stated he will be presented with a wheel similar to the one he rode. similar to the one ne rode.

Since Tuesday he has received the congratulations of many wheelmen, and Mr.

Wahl, who last held the record, says he

made a great ride.

Some credit is, of course, due his pacemakers for their steady work during the entire twenty-four hours, and the rider is given credit for having made excellent selections. Those who paced him were: Clarence Lee, E. T. Davidson, Chas. E. Gauze, C. 1. Ronsaville, W. H. Dakin, Fred Schade, William Jose, Washington Road Club, and J. J. Fister, H. S. Greer and Hardy Pritchard of the Georgetown Cycle

Made His Own Racing Wheel.

"They come high, but we must have em," is what John Mayne, a Lainganere mountaineer, thought when he saw hundreds of wheelmen riding over the smooth roads of Frederick county, Maryland, several months ago. John is only sixteen years old, but he thought he would be able to ride a bike. All that was necessary was to get the "bike," and that he made up his mind to do. He soon learned that a wheel would cost him anywhere from \$100 to \$150, and that was a little more than he felt able to pay. His funds were a little low, but he had made up his mind to have steed, leaving the fast horses in the rear. His cash did not increase in proportion to his desire for a wheel, and so out there on the farm in the mountainous country he went into his father's shop and started to construct a racer. He worked early and late, until he had finished the construction of the wheel as shown in the photograph, and now he is seen on the road trying to keep pace with some of the riders of pneumatic tired iron horses. The entire wheel, with the exception of an old iron tire from a carriage wheel, was made by the boy. The rear wheel is made of a solid piece of oak, while the handle bar and seat are of oak, while the handle bar and seat are of oak, while the handle bar and seat are made of a lighter wood. On a recent trip through that country made by the members of the Georgetown Cycle Club the rider was seen, and Dr. Downey of New Market, presented a picture of the boy and his wheel to Mr. George M. Hunt.

The Victor Club's Banquet. Saturday night members of the Victor Cycle Club met at the banquet table and discussed their recent successful race meet. or less on the branches are clustered three sharp spines a quarter to half an inch long. The full-grown plant, shaped like an inverted saucer, two to six feet in diameter, all grows from a single root less than half an inch thick. When the ground is frozen in November and the prairie breezes begin to practice for the winter this small root is twisted off and the whole plant turns up on edge, like a cart wheel, and goes off before the wind scattering seeds at every revolution.

Mr. S. B. Davis, the newly elected president of the club, presided at the banquet and called upon the members and friends for short speeches. The guests took occasion to congratulate the members of the victor Club upon the success which attended their meet, and the members of the club dwelt at length upon the necessity for the construction of a suitable race

track.

Among those present were: Messrs. S.
B. Davis, F. C. Handy, H. H. Miller, G.
Grant Armor, C. E. Miller, F. A. Schade,
Clarence Barnard, Thomas Gardner, jr.,
F. B. Suter, G. M. Hale, A. V. Skiles,
G. P. Hooker, G. E. Boyd, R. B. Schwickardy, unattached; R. B. Clokey, treasurer
Georgetown Cycle Club; Harry Smith, G.
C. C., and F. P. Libbey, Overman Wheel
Company.

This evening at 6 o'clock Capt. Miller
will lead members of the club on a run as
far as Cabin John bridge, the start for home
to be made at 8:30 o'clock. Club rooms were

to be made at 8:30 o'clock. Club rooms were procured, but as the location is not suitable for the purposes of the club, other quarters will soon be secured. On Thanksgiving day the club will give a hare and hound chase across the country on wheels.

Capital Club Runs.

Last Sunday several small parties were made up from the membership of the Capital Bi Club and enjoyed short runs in the country. Messrs. Macdaniel and Harban went to Laurel on the morning train and then took a long ride through Howard county. On their return in the direction of home they stopped at Laytonsville and visited friends. They reached the club house shortly after sundown.

The "drive whist" meeting last week brought out many ladies, friends of the club, and the games were exceedingly interesting. Tonight the first club "smoker" of the season is to be given, and on December 7 the next dance will be given.

At a recent meeting of the Carroll Institute cyclers Mr. Bernard Locraft was elected secretary-treasurer. Capt. Meegan has announced a cross-country run for tomorrow, on which occasion the fast riders will be given an opportunity to give an exhibition of rough road riding. Next month the club will begin a series of indoor amusements for the winter, consisting chiefly of dances and card parties.

The Washington Road Club will appear on the road in good form tomorrow and a large attendance on the run is expected, as the affair is to be given in honor of E. C. Yeatman, one of their number, who broke the 24-hour record. Last Sunday the club went to Dickey's, when the members engaged in a foot ball chase.

it is expected that he will soon be able to sit up and see his many friends.

The new schedule on the Baltimore and Ohio railroad goes into effect tomorrow, and there is already considerable grumbling on account of some changes which have been made in the trains. Laurel has been very fortunate as to the train service, there being not less than thirty-three trains a day stopping here, but from what is known of the new arrangement two of the most important trains to the people here have been discontinued. It is hoped, however, that some other satisfactory arrangement will be made.

The surveyors for the electric road linger in the vicinity as if there were twenty lines of so many contradictory reports.

THE AMERICAN CATARRH CURE is the result

of 26 years' study and treatment of the disease.
One bottle convinces the most skeptical. It is always ready for use, needing neither donche nor atomiser. It restores the hearing, cures the hawking cough and expectorating, removes headache and nose bleeding, increases the appetite, produces sound aleep, invigorates the whole system and in ing a great deal ing a great deal

It is impossible for any one to enjoy perfect health while suffering from the dropping of mucus in the threat, which is ever offensive and unheaithy in character and poisons every breath that is taken into the lungs, thereby rendering the blood unhealthy and impure and leading to consumption of the lungs. What a boon to mankind must be the remedy which will prevent this suffering and restore perfect health. To the many thousands restore perfect health. To the many thousands who have despaired of being cured of this terrible disease we cheerfully recommend the AMERICAN CATARRH CURE. It gives immediate relief. The sense of relief is so great that after twenty-four bours' use the sufferer gladly continues the remedy, feeling and realizing that only perseverance is needed to restore to health. It possesses wonder-ful power in restoring the full vocal power of
